About Us

We are a professional manufacturer specializing in **solar mounting brackets, galvanized angle steel, C-channel steel and related steel structures.**

With complete production lines and strict quality control, we supply reliable solar mounting products for ground, rooftop, carport and other solar projects.

We support OEM & ODM, provide standard and customized solutions with competitive ex-factory price.

Our Advantages

- ✓ Hot dip galvanized / Zinc-Aluminum-Magnesium coating, long anti-corrosion life
- ✓ Strict quality inspection, comply with international standards
- ✓ Fast production & on-time delivery
- ✓ Professional one-stop service from design to shipment

Product Range

1. Ground Solar Mounting System

2. Rooftop Solar Mounting System

3. Solar Carport Mounting System

4. Galvanized Steel Accessories

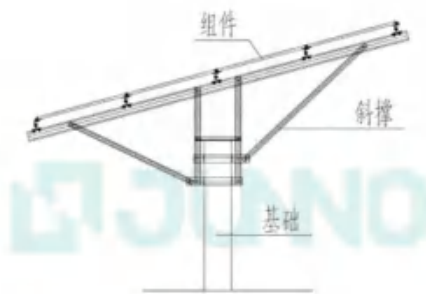

一、 Ground Solar Mounting System

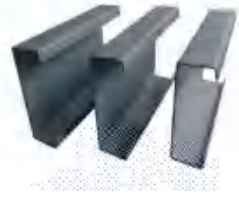

Suitable for large-scale solar farm, open field and outdoor solar projects.
Made of hot dip galvanized steel or zinc-aluminum-magnesium steel, excellent wind & snow load resistance, stable structure and easy installation.

Main Material: Hot dip galvanized steel / Zn-Al-Mg steel

Coating Standard: $\geq 65\mu\text{m}$ zinc layer, anti-rust over 20 years

Feature: Easy assembly, strong bearing capacity, cost-effective

Item	Specification	Material	
C Channel steel	Customized	Galvanized Steel / ZAM	
Pipe Clamp	Customized	Galvanized Steel/ ZAM	
Fittings	Standard	Galvanized Steel	

二、Rooftop Solar Mounting System

Designed for residential, commercial and industrial rooftop solar projects.

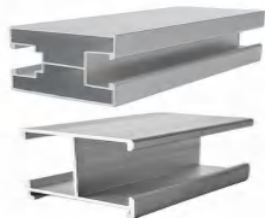

Light weight, no damage to roof surface, flexible installation angle. Widely used for tile roof, metal roof and concrete roof.

Main Material: Galvanized steel / Aluminum alloy

Advantage: Space-saving, simple structure, quick installation

Application: Factory building, warehouse, residential house

Item	Specification	Material	
Aluminum Solar Rail	30x40/40x40/40x45/40x50mm, Customized	6005-T5/6063-T5 Aluminum, Anodized	
Rail Splice Connector	Matched with rail model	6063-T5 Aluminum	

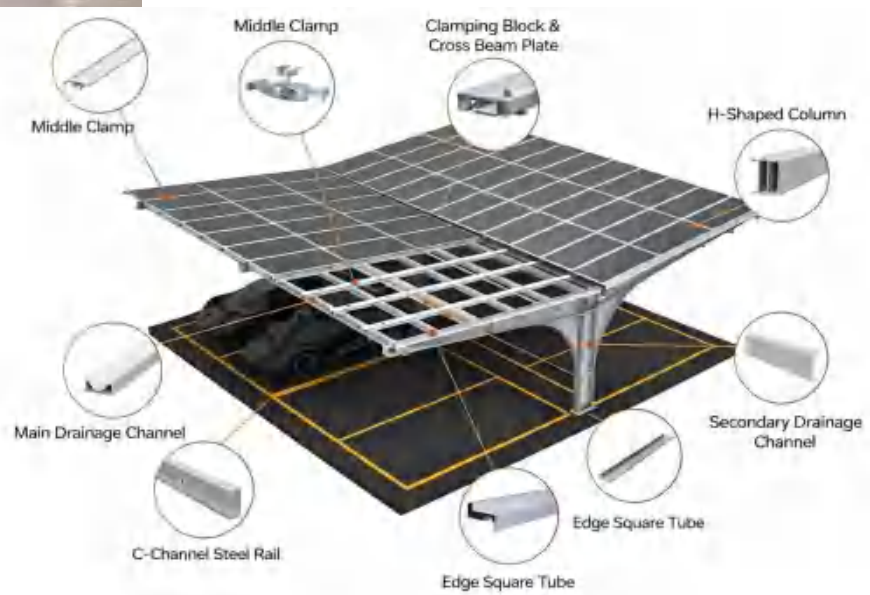

Mid/End Clamp	For 40-100mm module frame	6063-T5 Aluminum	
Solar Roof Clamp Kit			
Fastener Kit	M6/M8/M10 Bolt & Nut	Stainless Steel 304	

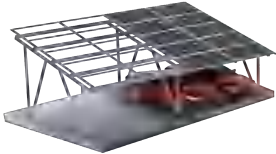

三、 Solar Carport Mounting System

Dual function: Solar power generation + Car parking shelter.

Integrated design, sturdy and beautiful. Perfect for parking lot, community, company and commercial areas.

Feature: Weather resistance, large load capacity, durable for long-term use

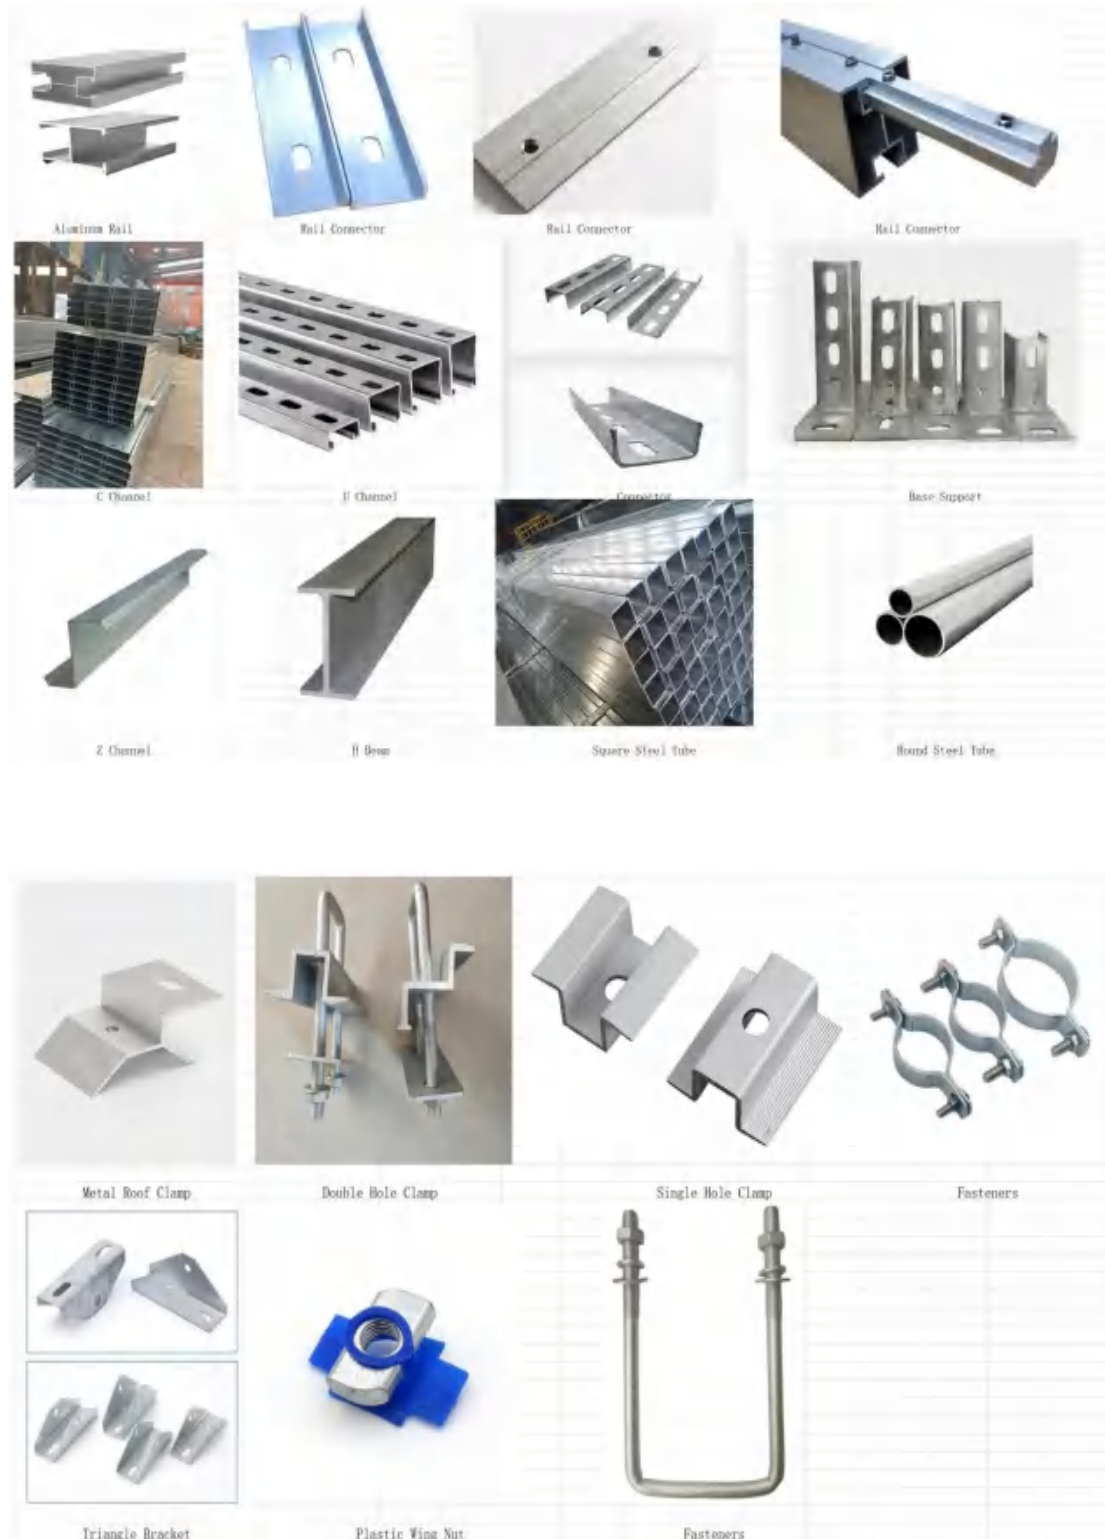

Item	Specification	Material	
Single-Slope /Double-Slope Carport Steel Frame	Customized	Q235B/Q355B Carbon Steel Hot dip galvanized steel / paint spraying	
Purlin	Customized(e.g. C100/C150/C200)	Hot dip galvanized steel / ZAM steel	
Mid/End Clamp	For 40-100mm module frame	6063-T5 Aluminum	
Column Base Plate	Customized size with anchor bolt holes	Galvanized steel	
Fastener Kit	M10/M12/M16 Bolt & Nut	Stainless Steel 304	

Galvanized Steel Accessories

Galvanized Angle Steel / C Channel Steel/H beam

Our standard steel profiles are widely used as main parts for all solar mounting systems.

Quality Standard & Production Technology

- All products comply with **ISO international standards**
- Strict raw material inspection + finished product test
- Salt spray test passed for anti-corrosion performance
- Uniform coating, smooth surface, no burr
